

RAISED-BED GARDENS

Available in a variety of sizes

A Better Garden Bed

Raised-Bed Gardens are the trend all over the country. Whether for City Parks, Community Associations, Elderly Care or your backyard, they are the modern way to grow flowers, raise fresh vegetables and extend your growing season. Raised-Bed Gardens will use less water and fertilizer plus improve soil conditions.

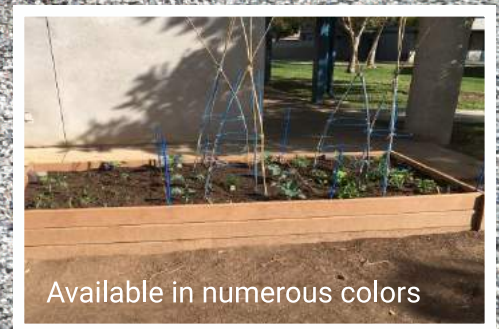

Imagine using lumber around Garden Beds that: will not rot; is impervious to insects, moisture, and mold; is sterile, easy to clean and maintains its vibrant color. Unlike pressure-treated wood, it will not leach any dangerous chemicals.

Plastic lumber outperforms any other material for raised garden beds, with a 50 year warranty. Made from recycled materials, it is the safe, environmentally friendly solution for gardening needs.
